

BECAUSE **YOUR SUCCESS IS OUR SUCCESS,**
INTEGRAM ADDS **VALUE AT EVERY LEVEL**

You'll never find another direct mail service so determined to assure the success of every campaign...

...at every possible touch-point.

For example, our handwork staff has been perfecting the craft of assembling packages for over 20 years. They put their hearts and heads into maintaining the reputation of INTEGRAM with every package.

Our focus on making a quality impression is why, for years now, the Smithsonian has come to INTEGRAM to prepare its annual calendar package—they just don't trust anyone else with their most important mailing of the year.

The Smithsonian has made it clear they can't afford to have the presentation make anything but the best possible impression, so they come to INTEGRAM because we've met those high expectations, mailing after crucial mailing!

INTEGRAM creates direct mail that impresses at every opportunity—and makes itself welcome.

From the reception desk to the warehouse, INTEGRAM people take pride in your success

Most companies in the mailing business print exactly what you give them, no questions asked. But we at INTEGRAM have always said our success depends on yours, and so even our warehouse workers keep an eye out for potentially costly errors.

Recently, for instance, a client submitted a letter that included typos, grammatical errors and the misspelling of President Barack Obama's name. Immediately, we let them know, made the changes on the documents and the piece that mailed looked totally professional.

We believe our client could afford nothing less.

Mailings can hit harder and work better...

...by, in some cases, appearing top-notch in every detail. In other instances, arriving first makes all the difference. And sometimes using an innovative physical format—like "lumpy mail"—makes a message stand apart.

Perhaps your next mail campaign would benefit from a new depth of data mining. Our expert data analysis may reveal a rich vein of related prospects... identifying a niche-with-a-need that you didn't know was there!

Consider the many Distinct Solutions that INTEGRAM offers. From Dimensional Mail to Handwork, from Data Mining to Strategic Advice—and even Outsourced Print and Mail production management services—you can rest assured that INTEGRAM will provide them all with a single goal in mind:

To add value at every opportunity. Because we really do believe that your success is our success, and so we seek out problems, triple-check details, and never stop focusing on the overall worth and success of your program.

(over, please)
